

ParadiseFoods.com

Caribbean Wholesale Product Catalogue

A curated multi-category range for supermarkets, hospitality, maritime and retail partners - combining trusted European sourcing with locally sourced products, dependable availability and care at every stage.

Season 2026/2027

ParadiseFoods

Caribbean Wholesale Product Catalogue

From Europe to the Caribbean. Delivered with kindness.
Paradise Foods - a European-Caribbean innovative platform for resilient food systems.

Paradise Foods connects trusted European sourcing with local Caribbean products, insight, infrastructure and partnerships - making quality food more accessible, reliable and easier to manage for businesses across the region.

We serve supermarkets, hospitality, cruise and maritime operators, as well as other professional food partners, with a curated range of fresh, dairy, frozen, and premium products.

Our model combines dependable international supply with local operations, digital solutions and on-the-ground market knowledge. This helps our partners plan with greater confidence, maintain consistent quality and respond to the everyday realities of island markets.

Food is not only a product.
It is availability, continuity and the possibility to serve people well.

- Trusted European and global sourcing
- Local Caribbean products, infrastructure and market knowledge
- Reliable supply for professional food partners

Building a more reliable food supply

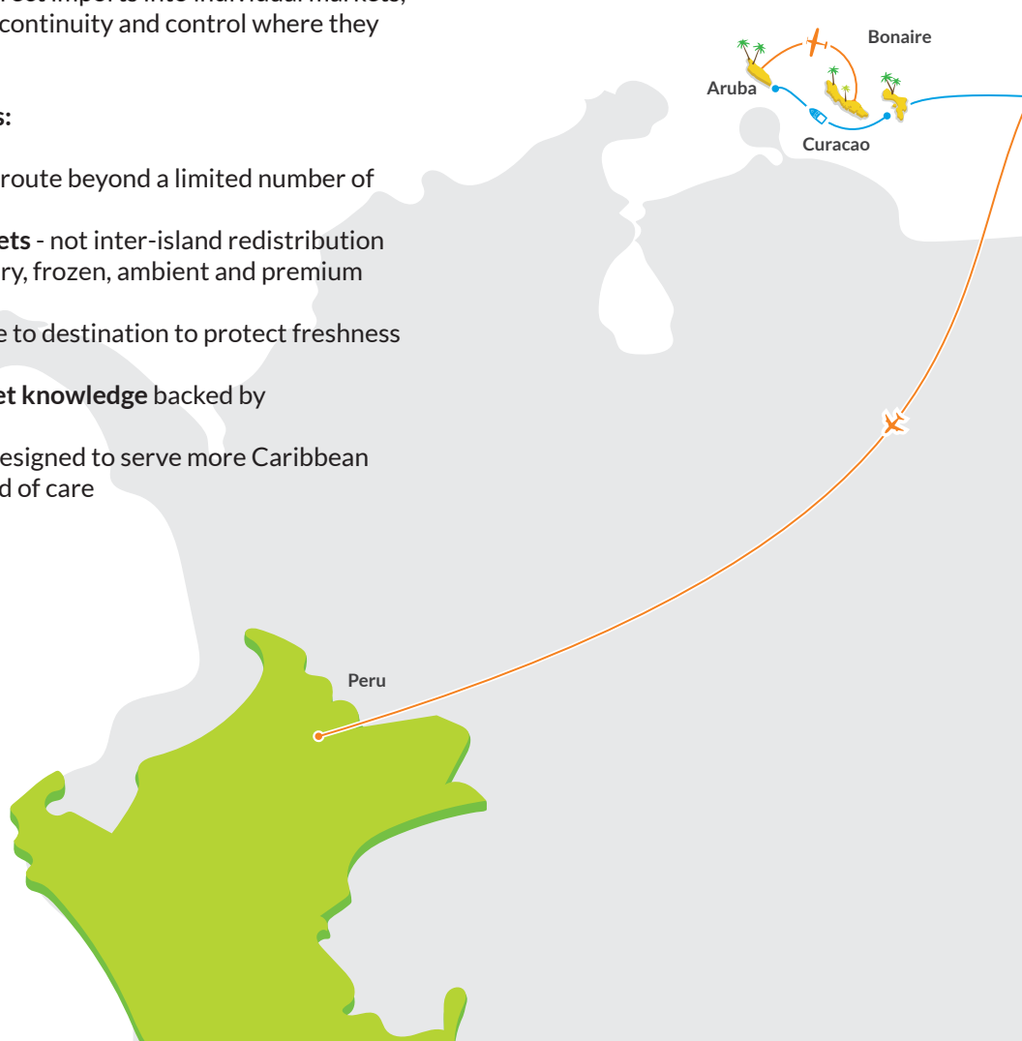

Paradise Foods is expanding a direct European sourcing route for the Caribbean and neighbouring markets. We connect a strong network of European growers, producers and supply partners with local Caribbean infrastructure, market expertise and digital ordering solutions.

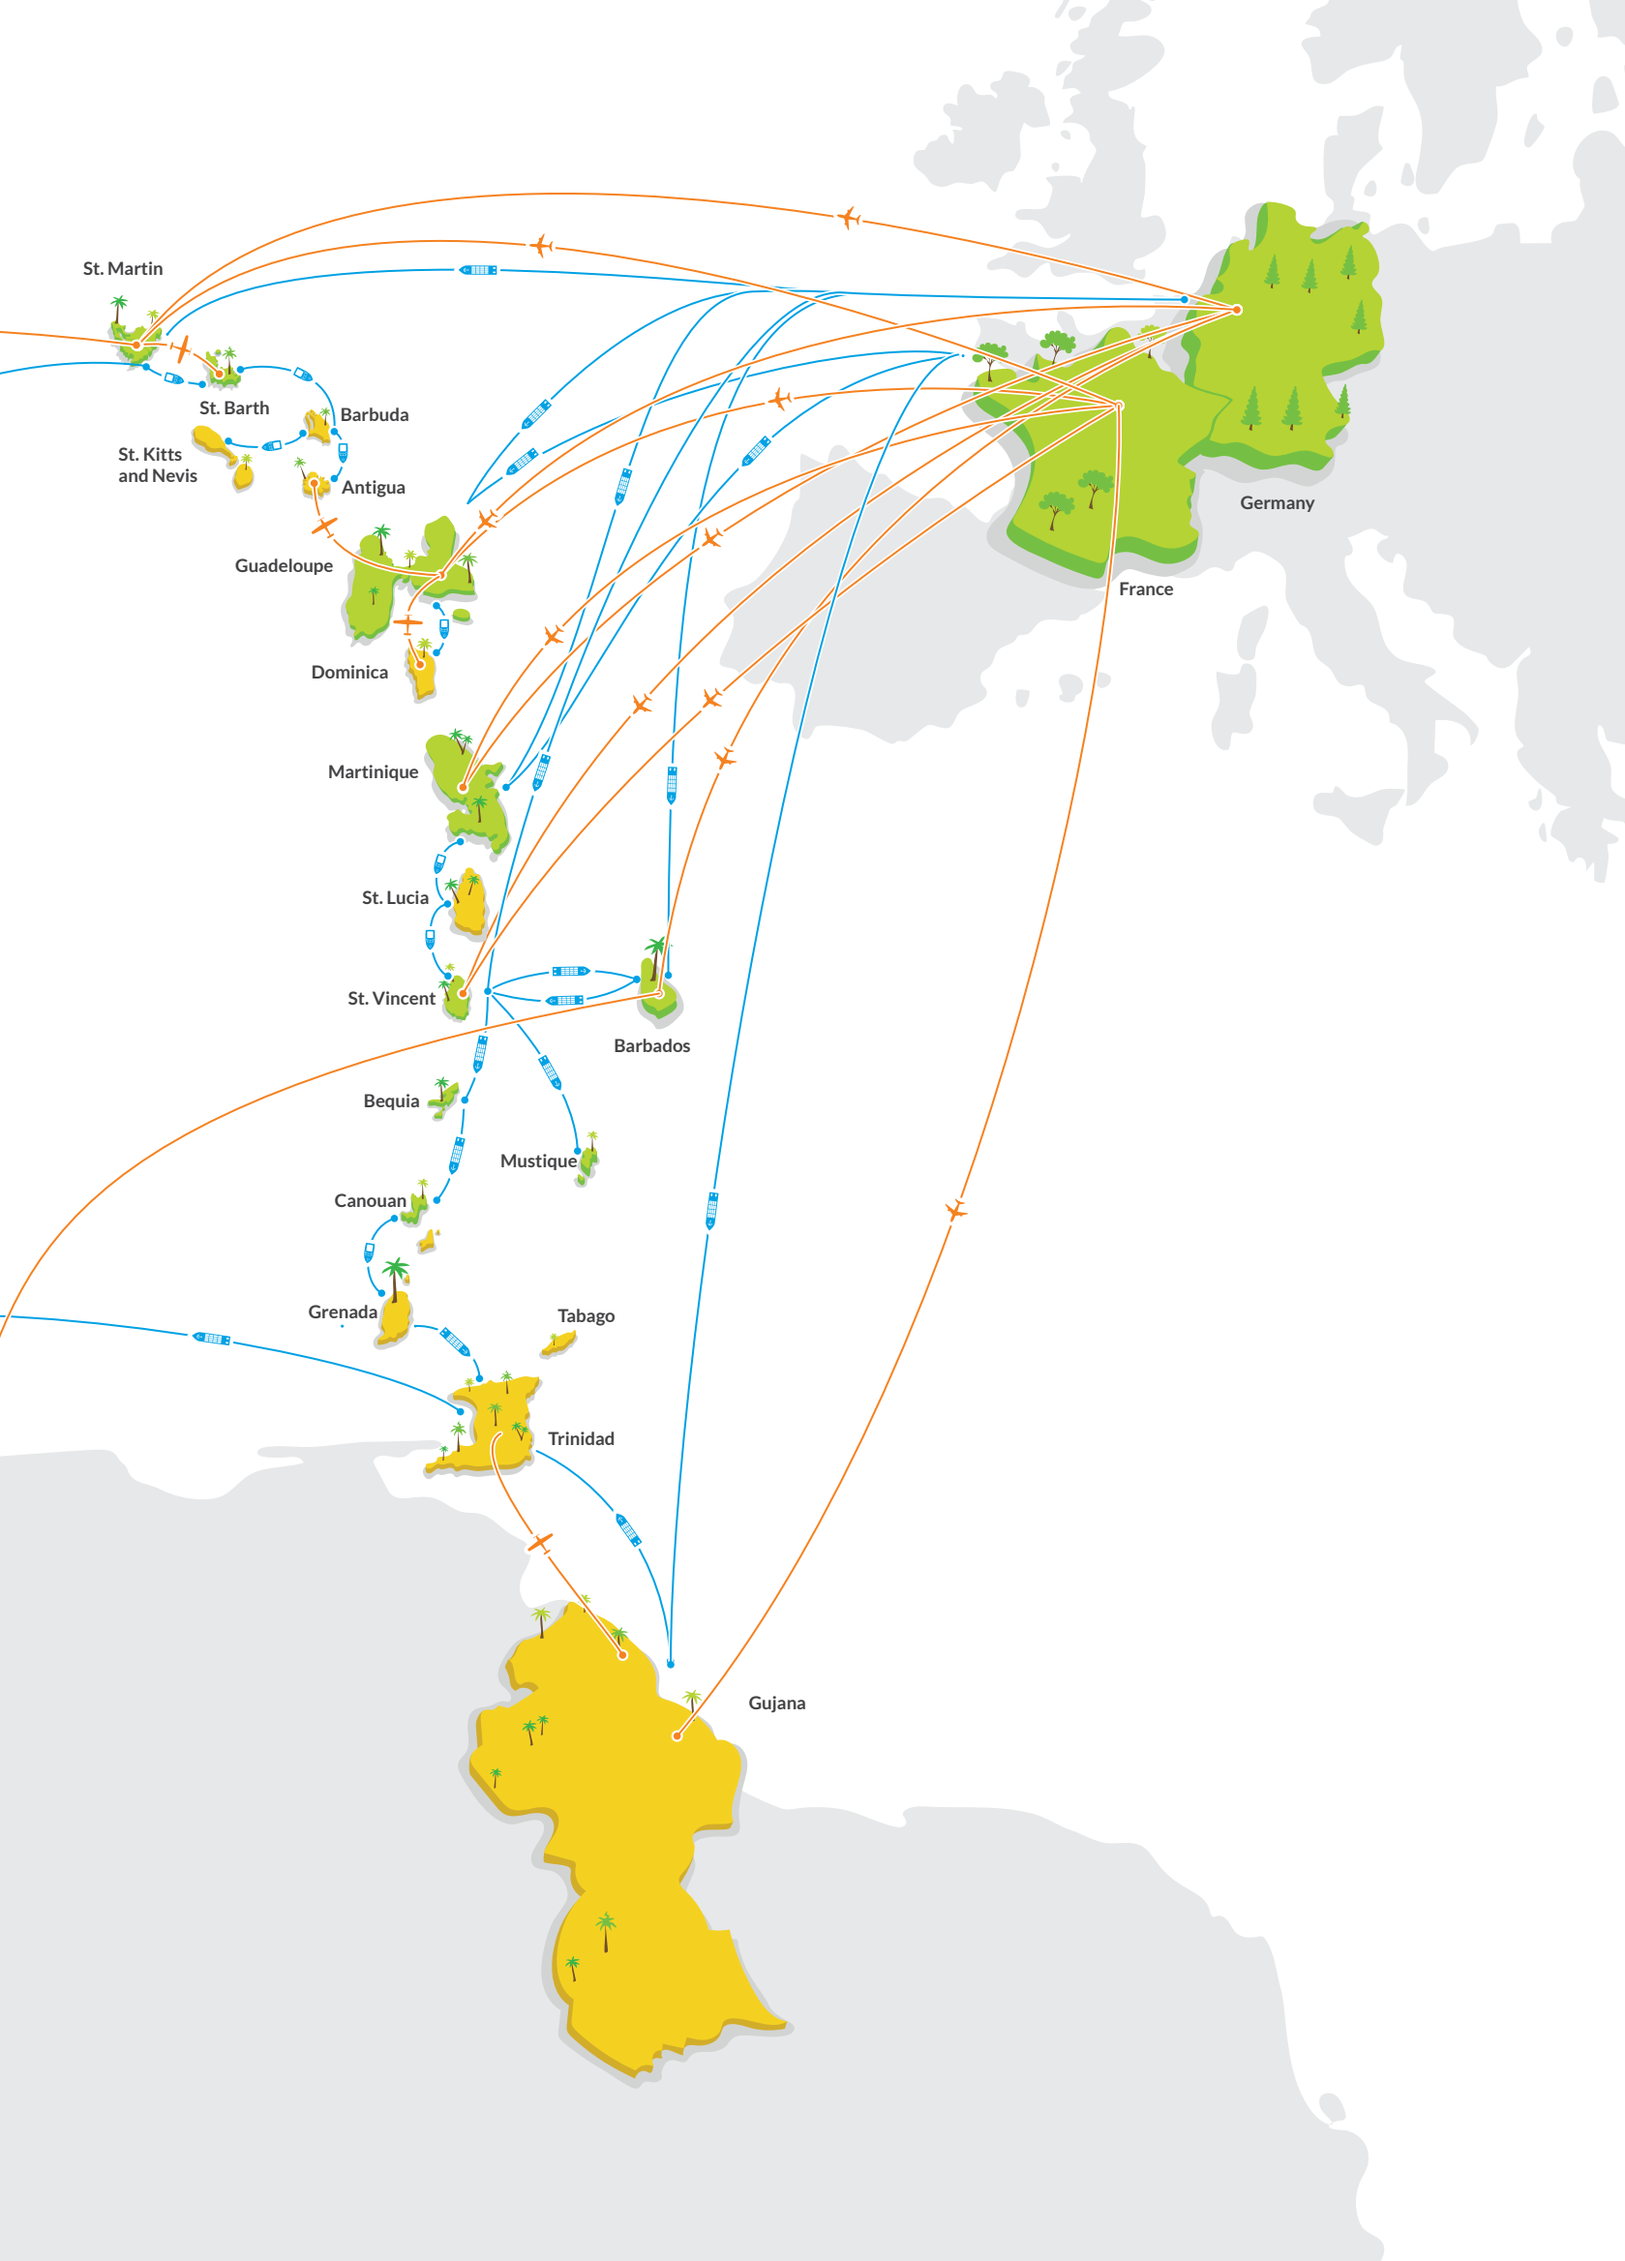

This gives professional food partners a more diversified supply option - with dependable year-round availability, consistent quality and greater visibility from source to destination.

Through our partnership with Gemüsering, one of Europe's leading fruit and vegetable groups, we offer access to a broad, professionally managed supply network spanning Europe, Latin America and Africa. Combined with local teams and direct imports into individual markets, it enables us to deliver freshness, continuity and control where they matter most.

What this means for our partners:

- **A diversified European supply** route beyond a limited number of traditional import channels
- **Direct imports into local markets** - not inter-island redistribution
- **Year-round access** to fresh, dairy, frozen, ambient and premium product ranges
- **Cold-chain control** from source to destination to protect freshness and quality
- **Local infrastructure and market knowledge** backed by European-scale sourcing
- **A growing regional footprint** designed to serve more Caribbean markets with the same standard of care

Built for the businesses that keep the Caribbean moving.

Who we support:

- Supermarkets and independent retailers
- Hotels, resorts and villas
- Restaurants, chefs and catering teams
- Cruise, yacht and charter operators
- Maritime and offshore operations
- Corporate, institutional and project-based food supply

When food supply is central to your business, you cannot afford to build your menu, retail shelves or guest experience around last-minute availability.

That is why Paradise Foods works at scale: we import full containers, hold stock in local warehouses and cold-storage facilities, and plan supply around the real volumes of professional operations. The result is greater availability, protected freshness and far fewer compromises when demand matters most.

Make your food supply one less thing to worry about.
Tell us what your business needs: **business@paradisefoods.com**

From farms to markets - and beyond.

Reliable food supply begins long before a container reaches the Caribbean. From open-field farming to advanced greenhouse cultivation, hydroponics and vertical farming, production is supported by innovation at every stage. This gives us stronger control over product quality, seasonality and freshness from origin onwards.

Grown for consistency: a broad production and grower network helps secure reliable access to fresh produce throughout the year.

Innovation from the ground up: modern greenhouses, hydroponic systems and vertical farming support efficient, high-quality production - even when traditional growing conditions are less predictable.

Quality that travels well: professional harvesting, packing and logistics processes help protect freshness and product quality across the journey to the Caribbean.

A more responsible supply model: production is increasingly supported by clean energy and resource-conscious practices. Gemüsering is already climate-neutral at two-thirds of its sites, with an ambition to reach climate neutrality across its full supply chain by 2028.

Grown with innovation, handled with care, supplied with confidence.
