

Caribbean Wholesale & Retail Product Catalogue

Comprehensive multi-category assortment of imported and locally sourced products, for supermarkets, hospitality, provisioning partners, yachts and retail.

Season 2025/2026
Version 1.1

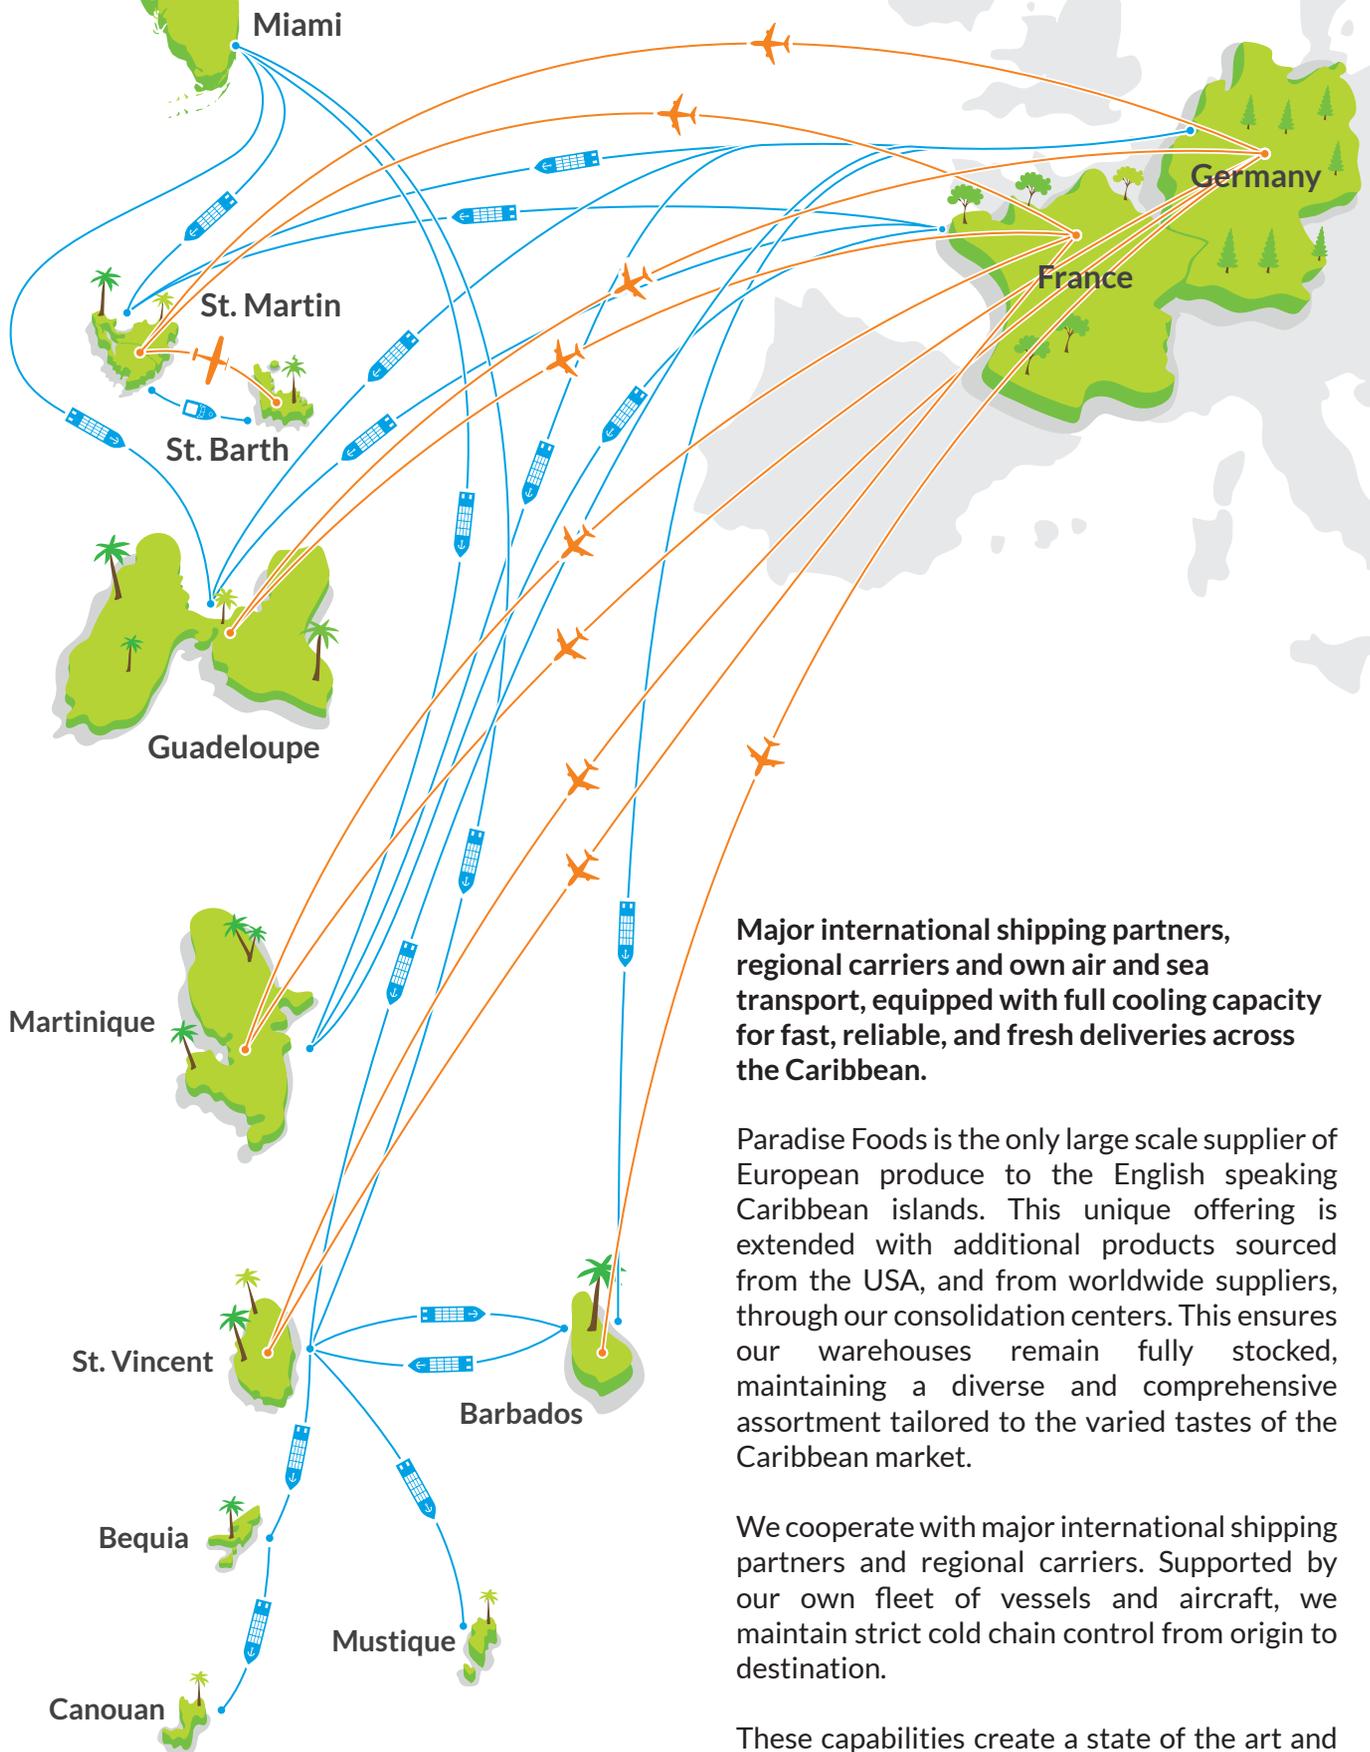

Caribbean Wholesale & Retail Product Catalogue

Comprehensive multi-category assortment of imported and locally sourced products,
for supermarkets, hospitality, provisioning partners, yachts and retail.

Season 2025/2026
Version 1.1

USA

Major international shipping partners, regional carriers and own air and sea transport, equipped with full cooling capacity for fast, reliable, and fresh deliveries across the Caribbean.

Paradise Foods is the only large scale supplier of European produce to the English speaking Caribbean islands. This unique offering is extended with additional products sourced from the USA, and from worldwide suppliers, through our consolidation centers. This ensures our warehouses remain fully stocked, maintaining a diverse and comprehensive assortment tailored to the varied tastes of the Caribbean market.

We cooperate with major international shipping partners and regional carriers. Supported by our own fleet of vessels and aircraft, we maintain strict cold chain control from origin to destination.

These capabilities create a state of the art and unmatched pan Caribbean logistics solution, for both fresh food import and export.

Paradise Foods restocks its warehouses at least once a week by air and once per month by sea. Goods arriving to major islands are transferred the same or next day to smaller island warehouses, to ensure steady availability across the region.

Sea shipments from Europe take only 10 to 12 days door to door, and depart directly from our own European warehousing facilities. This ensures tight control of the cold chain, which guarantees that European produce arrives fresher than goods typically sourced from Miami. Sensitive and fresh items travel in optimal conditions and reach the Caribbean with excellent shelf life.

Air shipments, arriving within 2 to 3 days, are reserved for ultra fresh products such as sensitive fruits, vegetables, such as berries and microgreens.

Availability and Lead Times

All items listed in this catalogue can be sourced and delivered to Caribbean destinations through Paradise Foods. For products that are already in our Caribbean warehouses and available for immediate delivery, please refer to our live inventory in the Paradise Foods app or at business.paradisefoods.com. These items are typically delivered within 24 hours, depending on the island.

Products shown in this catalogue but not listed in our online inventory are supplied from our European warehouses. Lead times vary by transport mode. **Air shipments generally arrive within a week, while sea shipments may require more than two weeks.**

For larger quantities or full-scale assortment planning, we can source almost any product with a lead time of up to one month. If you are planning a major order, please keep this timeline in mind so we can secure availability and ensure smooth delivery.

How to place an order

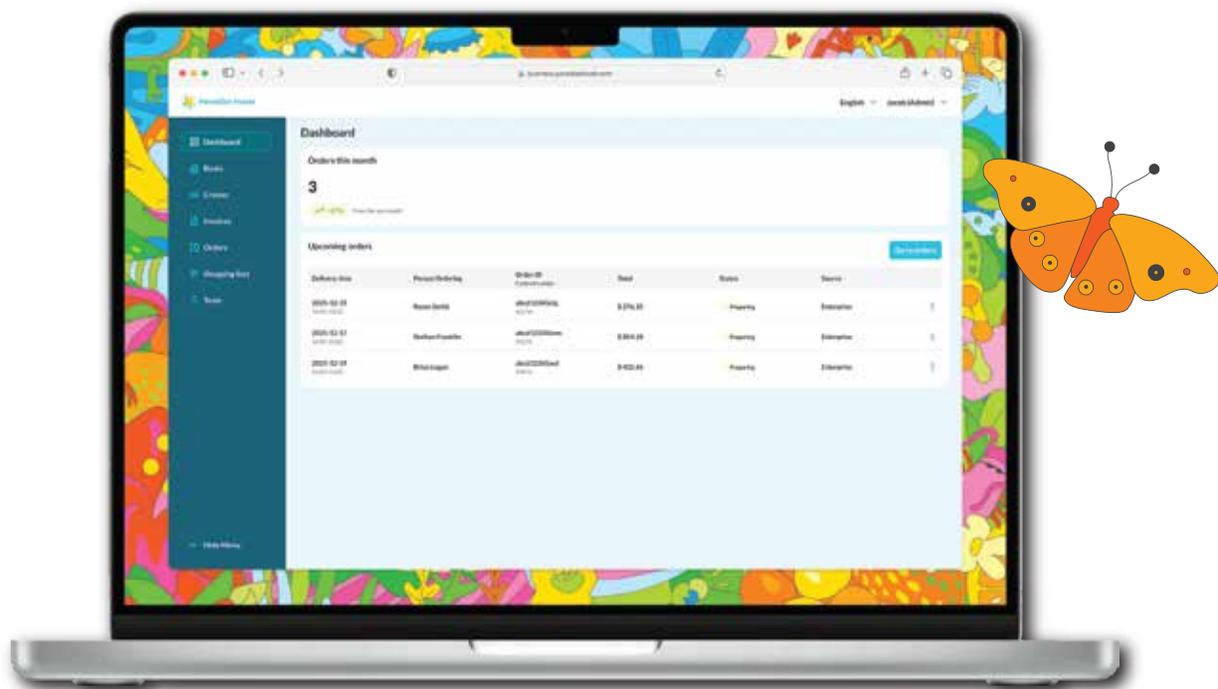

Orders can be placed through the **Paradise Foods app**, the **web based ordering system**, or by sending an email to **business@paradisefoods.com**.

The app and the online portal show available delivery slots, and in most cases delivery is made within **24h for orders placed in the morning**.

Special requests are also possible, including urgent or unique items that can be delivered at any time by private aircraft or boat for an additional fee. To arrange such requests please contact **business@paradisefoods.com**.

Professional online shop

For charter companies provisioning entire fleets and concierges managing multiple **villas**, Paradise Foods provides a web based professional shop designed for B2B partners.

business.paradisefoods.com - to get access, contact business@paradisefoods.com

Fruits & Vegetables

This category appears first in our catalogue because fresh produce is one of our core areas of expertise. We source both everyday staples and specialised items including berries, herbs, salad mixes and microgreens.

Over time we have also developed strong operational know-how for transporting fresh produce into the Caribbean. This includes careful selection of growers, controlled packing processes, and shipping methods tailored to the climate and the distances involved. As a result, fruit and vegetables arrive in consistently high quality, even for more delicate products.

While Paradise Foods supplies the full supermarket assortment across all major categories, fresh fruit and vegetables remain a central part of what we do. Items already stocked in the Caribbean are available for rapid delivery, and any products not held locally can be imported from Europe with clear and predictable lead times.

This section provides an overview of the fresh range available for supply across the region.
